## TRUSTEES' REPORT.

---

THE Cemetery of Mount Auburn, the earliest establishment of its kind in the United States, continues to take precedence in appearance and preservation over most of those which have since been constructed on its model. The general condition of the grounds is satisfactory, the roads and paths are in good repair, and the whole aspect of the Cemetery has been improved during the past year, by the introduction of many new monuments and stone inclosures, of beautiful and elaborate workmanship.

The eminence called on the maps "Cedar Hill," and well known as being the site of the Appleton Monument, has been wholly remodelled, and converted into a symmetrical mound of oval shape, uniformly turfed, and made accessible to carriages by a new avenue. This has been done at the voluntary expense of William Appleton, Esq., and it will hereafter constitute one of the conspicuous ornaments of the Cemetery.

The fountain on Thistle Path, announced as contracted for in the last Annual Report, has been completed, together with its basin, pipes, and drains, and has been in satisfactory operation for a number of weeks during the fall. The adjacent land, as stipulated in the contract, has been conveyed to Mrs. A. Hemenway, to be forever kept open, and the sum of \$6,000, in conformity to the agreement, has been paid by her to the Treasurer. The remainder of the low land in which the fountain is situated, is in process of reclamation by the removal of the mud, and by replacing it with gravel to such a height as to render it ornamental and suitable for Cemetery purposes.

In connection with this operation, with the consent of the proprietors, the summit of Laurel Hill in the same neighborhood has been taken off, and the gravel used to make the new land in the bog. This process, while it improves the appearance of the hill, is sure to prove remunerative to the Corporation from the sale of the newly made land, and of some of the steep declivities which are now made more level and available.

The new public lot called St. Matthew's Lot, situated on Spruce Avenue, is completed and enclosed by a hedge. It contains 19,609

square feet, and 633 single grave plots as exhibited on the plan. The present price of these, including the fee of interment, is fifteen dollars.

An extension of time has been allowed to the contractors for the granite front of the new catacomb upon Rosebay Avenue, who have continued their efforts to eradicate the stains from the stone in that structure, but hitherto, it is feared, without success.

It is again earnestly urged on the attention of those Proprietors who have not taken care to affix bounds or land marks to their lots, that they are liable to the loss or removal of their lots at any time, in consequence of this neglect. It is also especially recommended that those Proprietors who have made no provision for the future preservation of their lots, should give to the repair fund, either by donation or bequest, the small sum requisite to keep them in future repair; or at least that they should designate in their wills some suitable person to represent or succeed them as Proprietor. This precaution may prevent the lots from hereafter falling into decay in the hands of careless or non-resident parties.

In the matter of the suit against Mr. Jonathan Mann, referred to in the last Annual Report, a trial was had in the Supreme Judicial Court, before the Jury, in March, 1863, which resulted in a verdict of about two hundred and fifty dollars in favor of Mr. Mann. On motion of the Counsel for the Corporation, this verdict was set aside by the Court, as contrary to law and evidence; and the case stands for trial in April next.

By the Treasurer's Report it appears that the amount of the permanent fund for the future support of the Cemetery is now \$35,596.52. The repair fund now amounts to \$20,099.08. The amount of invested property exclusive of the above, together with the balance of cash in the Treasurer's hands is estimated at \$27,580.29. The sales during the past year have been unusually large, and notwithstanding the high price of labor and materials, it is trusted that the result of the year's operations will be satisfactory to the Proprietors.

By Order of the Trustees,

JACOB BIGELOW, *President.*

*Boston, January 25, 1864.*

## SUPERINTENDENT'S REPORT.

---

*To the Trustees of Mount Auburn Cemetery,*

GENTLEMEN,—

In accordance with the requirements of the Trustees, I herewith transmit the Annual Report of the Superintendent, for the year ending December 31st, 1863, as per account of his department.

Leaving a balance in his hands of	- - - - -	475.58
	<hr/>	<hr/>
		\$1,304.57

GEO. WM. BOND, *Treasurer.*

Boston, December 31, 1863.

This certifies that we have examined the books and accounts of the Treasurer of the Proprietors of the Cemetery of Mount Auburn, for the year ending December 31, 1863, and have found them correctly kept and properly balanced, with satisfactory vouchers for all payments charged.

The certificates of Stocks and other evidences of property were found in accordance with the statements in his accounts.

In the Fund for Repairs there appears to be a balance due from him of four hundred and seventy-five 58-100 dollars, and there is also due from him in General account, twenty-seven hundred and sixty-five 29-100 dollars.

CHARLES C. LITTLE,  
CHAS. G. NAZRO, } Finance Committee.

Boston, February 22, 1864.

The Property of the Corporation consists of:—

Cash,	-	-	-	-	475.58
					20,099.08

All of which is respectfully submitted,

GEO. WM. BOND, Treasurer.

and the like. This is a general introduction of the subject, and it will be necessary  
to go into more detail in the following pages. The first point to be considered is the  
method of obtaining the information required. There are two main methods: the  
first is to consult existing sources of information, such as books, articles, and  
websites; the second is to conduct original research, such as interviews, surveys,  
and experiments. Both methods have their advantages and disadvantages.  
The advantage of consulting existing sources is that it is a quick and easy way to  
get information. It is also a good way to get a broad overview of the subject. However,  
it can be difficult to find reliable sources, and it may not always be possible to find  
the exact information you need. Another disadvantage is that it may not be possible  
to find sources that are up-to-date, or that are relevant to your specific needs.  
The advantage of conducting original research is that it allows you to get  
information that is specifically tailored to your needs. It also allows you to  
control the quality of the information you receive. However, it can be time-consuming  
and expensive, and it may not always be possible to find the resources you need.  
Once you have obtained the information you need, the next step is to analyze it.  
This involves identifying the key themes and concepts, and determining how they  
relate to each other. It also involves identifying any patterns or trends in the data.  
This analysis will help you to understand the subject better, and to identify  
any potential issues or problems. Finally, you will need to draw conclusions  
from the analysis, and to propose recommendations for action. These recommendations  
should be based on the information you have gathered, and should be tailored  
to your specific needs.
